# Activity 09 - Order a Product Backlog with Customer Evidence

**Course:** Scrum Master Fundamentals for High-Performing Teams

**Course Code:** TGS-2024045803

**Alignment:** K1, K2, K7, A1, A2, A3

**Version:** v6.0 | 22 August 2026

## Scenario

A food-delivery platform has forty candidate items from customers, operations, fraud, accessibility, and growth teams. Every stakeholder labels their request high priority, and hidden dependencies cause rework during Sprints.

## Role briefs

### Role 1: Product Owner

Represent this role's legitimate goals, constraints, risks, evidence, and decision rights. Do not invent authority not stated in the scenario.

### Role 2: Scrum Master

Represent this role's legitimate goals, constraints, risks, evidence, and decision rights. Do not invent authority not stated in the scenario.

### Role 3: Developers

Represent this role's legitimate goals, constraints, risks, evidence, and decision rights. Do not invent authority not stated in the scenario.

### Role 4: Customer advocate

Represent this role's legitimate goals, constraints, risks, evidence, and decision rights. Do not invent authority not stated in the scenario.

### Role 5: Operations stakeholder

Represent this role's legitimate goals, constraints, risks, evidence, and decision rights. Do not invent authority not stated in the scenario.

## Questions to answer

1. Which evidence supports value?
2. What risk or learning should move earlier?
3. Which dependency changes the order?
4. Where must Product Owner judgement override a score?

## Scenario constraints

- Keep the Product Goal, Sprint Goal, and Definition of Done visible where relevant.
- Do not transfer Product Owner or Developer accountability to the Scrum Master.
- Separate facts, observations, interpretations, and decisions.
- Use evidence to choose an adaptation; do not rank individuals.
