WSQ | BUSINESS AGILITY

Scrum Master Fundamentals for High-Performing Teams

Build a Scrum system where evidence guides decisions and teams own improvement.

Course Code: TGS-2024045803
Trainer: Dr. Alfred Ang
Version v6.0 | 22 August 2026

Tertiary Infotech Academy Pte Ltd | UEN 201200696W

SECTION 00

Course Administration

Welcome | expectations | assessment | resources

Make value, flow, quality, and learning visible—then help the team adapt.

Digital Attendance | TRAQOM · SSG

1

AM

Scan and submit the morning attendance QR code.

2

PM

Scan and submit the afternoon attendance QR code.

3

ASSESSMENT

Complete the separate assessment digital attendance.

4

75% MINIMUM

Attendance and competent assessment outcome are funding requirements.

About the Trainer

Dr. Alfred Ang

Principal Trainer | Tertiary Infotech Academy

ROLE	Principal Trainer and learning architect
SPECIALISM	Agile delivery, AI and digital transformation
APPROACH	Evidence-led, scenario-rich and outcomes focused
FACILITATION	Coaching, simulation, feedback and applied practice
ORGANISATION	Tertiary Infotech Academy Pte Ltd
CONTACT	enquiry@tertiaryinfotech.com

Let’s Know Each Other

1. **Name and role**
2. Your experience with Agile or Scrum
3. One team outcome that matters
4. One impediment you want to handle better

Ground Rules

1

BE PRESENT

Give the speaker and the Sprint Goal your full attention.

2

BE CURIOUS

Inspect evidence before defending a position.

3

BE PRACTICAL

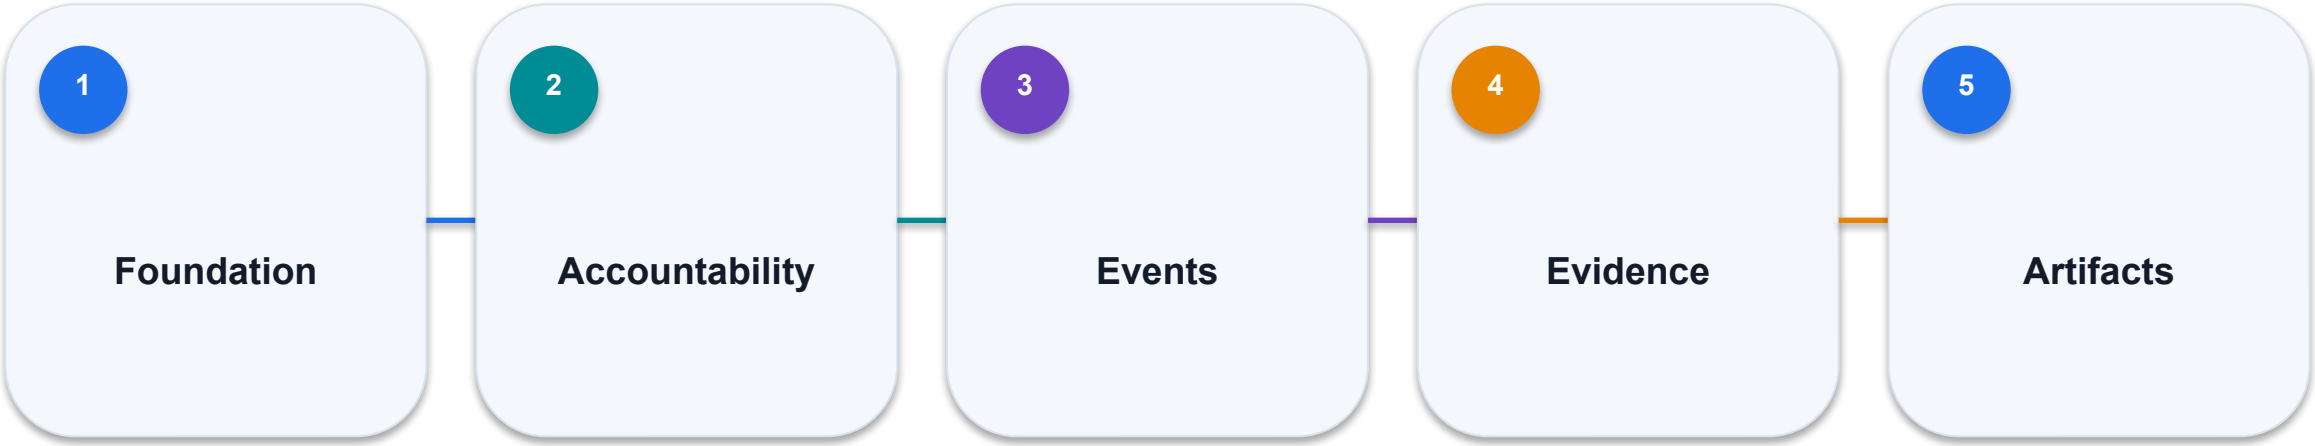

Test facilitation choices in realistic scenarios.

4

BE SAFE

Challenge the process without attacking the person.

Two-Day Learning Journey

Learning Outcomes

1

LO1

Implement Agile Scrum practices for requirements.

2

LO2

Manage Scrum accountabilities within policy.

3

LO3

Measure and experiment through Scrum events.

4

LO4 + LO5

Organize work and share artifacts for collaboration.

Skills Framework Alignment

TSC

Business Agility
ICT-BIN-4038-1.1

KNOWLEDGE

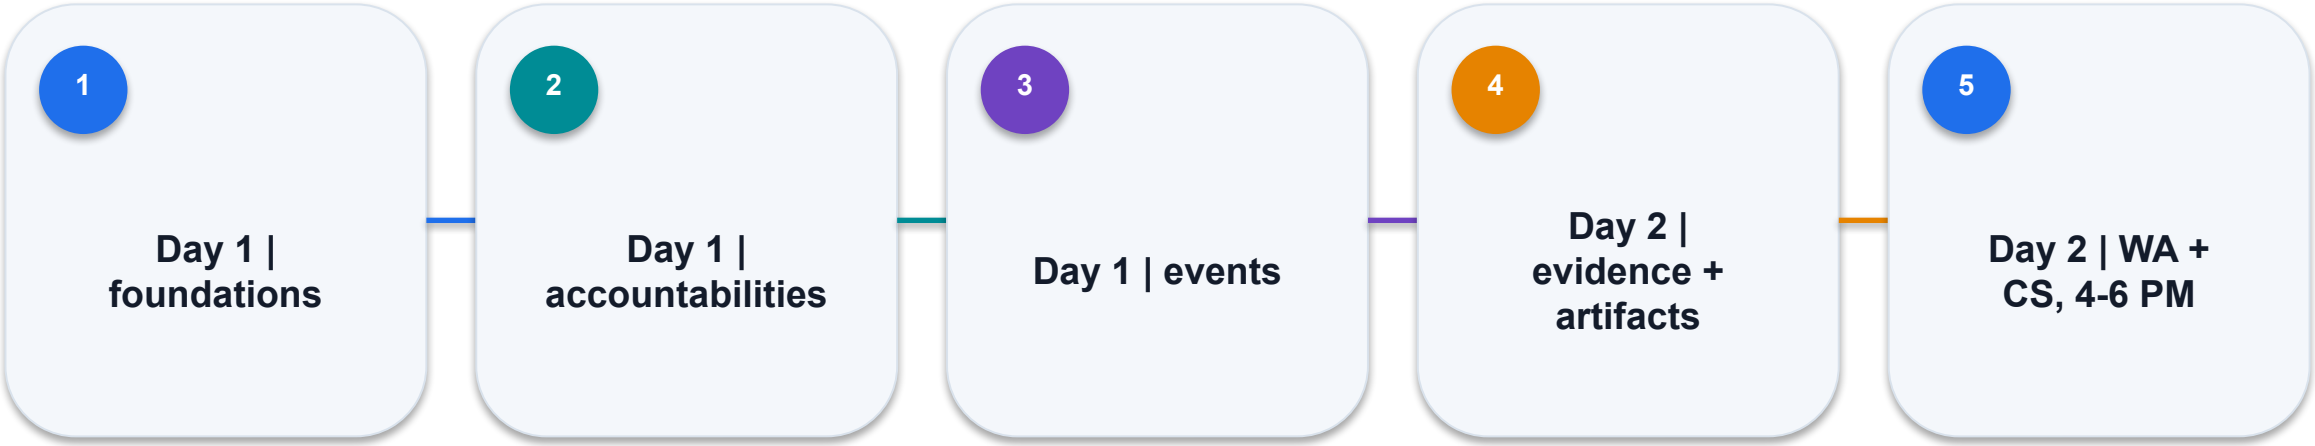

K1-K7: landscape, customers, policy, change, teams, values, methods

ABILITIES

A1-A7: share, organize, improve, measure, experiment, assess, own

9:00 AM-6:00 PM

Lesson Plan

Briefing for Assessment

1. **Individual, summative, open book; no discussion**
2. Use only approved course materials; phones and other materials under the table
3. Written Assessment: 1 hour; Case Study: 1 hour
4. Submit on the LMS and sign the Assessment Summary Record

OPEN BOOK | INDIVIDUAL

Assessment and Funding

WA | 1 HOUR

Seven open-ended questions covering K1-K7.

CASE STUDY | 1 HOUR

Five scenario questions covering A1-A7.

COMPETENCE

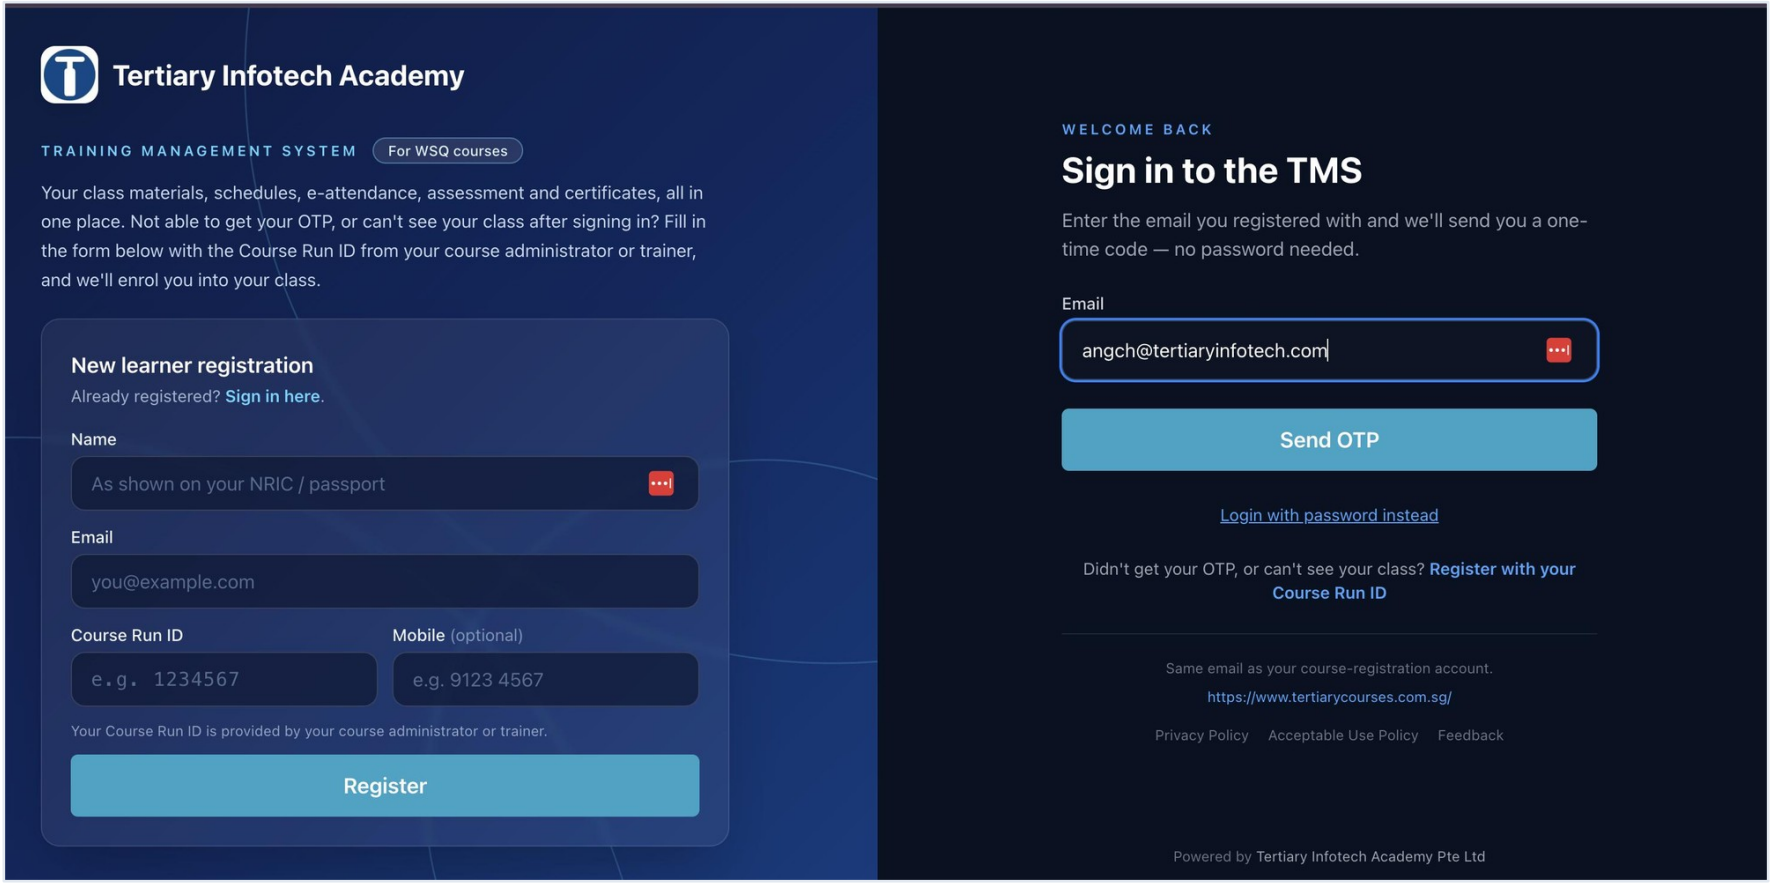

All required criteria competent; reassessment and appeal rights apply.

Assessment Flow

COURSE PORTAL

Login to LMS and Download Course Material

Log in at lms-tms.tertiaryinfotech.com with your registered email and the OTP sent to your inbox, then open this course to download the slides and Learner Guide.

Access the Course Activities

Every activity has its own folder with a detailed guide, scenario PDF, editable Excel worksheet, mock data, and acceptance checklist PDF.

SECTION 01

Scrum Foundations

Agile mindset | empiricism | values | framework | complexity | K1, K2, K6, K7, A3

Make value, flow, quality, and learning visible—then help the team adapt.

Why Agile Exists

Agility is the ability to change direction without losing purpose.

- **Complex work defeats long-range certainty**
- Early value creates evidence
- Customer feedback changes priorities
- Teams learn through short cycles

Why Agile Exists | What mastery looks like

1

Complex work defeats long-range certainty

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Early value creates evidence

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Customer feedback changes priorities

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Teams learn through short cycles

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Why Agile Exists | Case lens

SIGNAL

Watch for a plan defended after evidence changes.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Shorten the feedback loop and re-plan from what is known.

SCRUM MASTER PITCH

Agility is the ability to change direction without losing purpose.

Use this as the Scrum Master coaching line, then prove it through: Shorten the feedback loop and re-plan from what is known.

ORIGINAL COURSE MAXIM

Agile Values as Decision Tests

The values guide trade-offs; they do not ban process, documentation, contracts, or plans.

Individuals and interactions

Working outcomes

Customer collaboration

Responding to change

Agile Values as Decision Tests | What mastery looks like

1

Individuals and interactions

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Working outcomes

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Customer collaboration

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Responding to change

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Agile Values as Decision Tests | Empirical loop

SCRUM MASTER PITCH

“The values guide trade-offs; they do not ban process, documentation, contracts, or plans.”

Use this as the Scrum Master coaching line, then prove it through: Ask which choice improves learning and customer value now.

ORIGINAL COURSE MAXIM

Scrum Is a Lightweight Framework

Scrum provides the minimum structure needed to expose reality and improve.

- **One Scrum Team**
- Three accountabilities
- Five events
- Three artifacts and commitments

Scrum Is a Lightweight Framework | What mastery looks like

1

One Scrum Team

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Three accountabilities

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Five events

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Three artifacts and commitments

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Scrum Is a Lightweight Framework | Case lens

SIGNAL

Watch for extra roles quietly taking accountability.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Return ownership to the Scrum Team and make work transparent.

SCRUM MASTER PITCH

“Scrum provides the minimum structure needed to expose reality and improve.”

Use this as the Scrum Master coaching line, then prove it through: Return ownership to the Scrum Team and make work transparent.

ORIGINAL COURSE MAXIM

Empiricism: Transparency-Inspection-Adaptation

Inspection without adaptation is reporting theatre.

- **Transparency creates a shared view**
- Inspection compares reality with intent
- Adaptation changes product or process
- Cadence makes learning routine

Empiricism: Transparency-Inspection-Adaptation | What mastery looks like

1

Transparency creates a shared view

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Inspection compares reality with intent

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Adaptation changes product or process

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Cadence makes learning routine

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Empiricism: Transparency-Inspection-Adaptation | Empirical loop

SCRUM MASTER PITCH

Inspection without adaptation is reporting theatre.

Use this as the Scrum Master coaching line, then prove it through: Name the decision each inspection can trigger.

ORIGINAL COURSE MAXIM

Scrum Values Create the Climate

Values are observable behaviours, not posters on a wall.

- **Commitment to goals**
- Focus on the Sprint
- Openness about work
- Respect for capable people

Scrum Values Create the Climate | What mastery looks like

1

Commitment to goals

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Focus on the Sprint

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Openness about work

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Respect for capable people

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Scrum Values Create the Climate | Case lens

SIGNAL

Watch for a blocker hidden to protect appearances.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Reward early truth and responsible experimentation.

SCRUM MASTER PITCH

“Values are observable behaviours, not posters on a wall.”

Use this as the Scrum Master coaching line, then prove it through: Reward early truth and responsible experimentation.

ORIGINAL COURSE MAXIM

REAL-WORKPLACE PRACTICE

Activity 01 | Diagnose Scrum Foundations at HarborHealth

K1, K2, K6, K7, A3

HarborHealth is replacing a patient-booking service. Leaders approved a twelve-month requirements plan, but regulations, clinic workflows, and patient expectations are changing monthly. Teams report defects late and customer feedback arrives only at final acceptance.

ROLE PLAY

Rehearse the decision with Scrum Master, Product Owner, Developer.

EVIDENCE

Produce complexity and landscape diagnostic and feedback-loop map.

QUALITY GATE

Uses current and future business/customer evidence.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

Topic 1 | Evidence of competence

PROOF OF SHARED MEANING

A Scrum Master intervention is credible when it improves transparency, preserves accountability, enables adaptation, and produces evidence of effectiveness.

Lunch Break

45 minutes

Pause the noise. Return with attention.

SECTION 02

Scrum Accountabilities and High-Performing Teams

Scrum Master | Product Owner | Developers | self-management | team norms | K3, K5, A7

Make value, flow, quality, and learning visible—then help the team adapt.

One Team, Three Accountabilities

Accountability clarifies ownership without creating silos.

- **Product Owner maximizes value**
- Scrum Master improves effectiveness
- Developers create the Increment
- All share one Product Goal

One Team, Three Accountabilities | What mastery looks like

1

Product Owner maximizes value

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Scrum Master improves effectiveness

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Developers create the Increment

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

All share one Product Goal

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

One Team, Three Accountabilities | Case lens

SIGNAL

Watch for work bouncing between role boundaries.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Use the shared goal to reconnect decisions.

SCRUM MASTER PITCH

Accountability clarifies ownership without creating silos.

Use this as the Scrum Master coaching line, then prove it through: Use the shared goal to reconnect decisions.

ORIGINAL COURSE MAXIM

The Scrum Master Is Accountable for Effectiveness

A Scrum Master creates conditions for the team to solve, learn, and improve.

- **Establish Scrum as defined**
- Coach self-management
- Remove impediments
- Enable useful events

The Scrum Master Is Accountable for Effectiveness | What mastery looks like

1

Establish Scrum as defined

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Coach self-management

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Remove impediments

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Enable useful events

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

The Scrum Master Is Accountable for Effectiveness | Empirical loop

SCRUM MASTER PITCH

“A Scrum Master creates conditions for the team to solve, learn, and improve.”

Use this as the Scrum Master coaching line, then prove it through: Coach the system instead of owning the team's work.

ORIGINAL COURSE MAXIM

Product Owner: Value and Product Backlog

The Product Owner may delegate work but remains accountable for value decisions.

- **Develop and communicate Product Goal**
- Create clear Product Backlog items
- Order work
- Ensure transparency and understanding

Product Owner: Value and Product Backlog | What mastery looks like

1

Develop and communicate Product Goal

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Create clear Product Backlog items

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Order work

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Ensure transparency and understanding

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Product Owner: Value and Product Backlog | Case lens

SIGNAL

Watch for a committee with no final value decision.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Make one accountable Product Owner visible.

SCRUM MASTER PITCH

“The Product Owner may delegate work but remains accountable for value decisions.”

Use this as the Scrum Master coaching line, then prove it through: Make one accountable Product Owner visible.

ORIGINAL COURSE MAXIM

Developers: A Usable Increment Every Sprint

Self-management means owning how work is turned into value.

- **Create the Sprint plan**
- Build quality through Definition of Done
- Adapt daily toward Sprint Goal
- Hold one another professionally accountable

Developers: A Usable Increment Every Sprint | What mastery looks like

1

Create the Sprint plan

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Build quality through Definition of Done

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Adapt daily toward Sprint Goal

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Hold one another professionally accountable

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Developers: A Usable Increment Every Sprint | Empirical loop

SCRUM MASTER PITCH

Self-management means owning how work is turned into value.

Use this as the Scrum Master coaching line, then prove it through: Let Developers plan and adapt the work.

ORIGINAL COURSE MAXIM

Build a High-Performing Team System

Performance grows when candour and accountability reinforce each other.

- **Cross-functional skills**
- Psychological safety
- Working agreements
- Stable membership

Build a High-Performing Team System | What mastery looks like

1

Cross-functional skills

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Psychological safety

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Working agreements

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Stable membership

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Build a High-Performing Team System | Case lens

SIGNAL

Watch for polite silence masking risk.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Create explicit norms for dissent, decisions, and help.

SCRUM MASTER PITCH

“Performance grows when candour and accountability reinforce each other.”

Use this as the Scrum Master coaching line, then prove it through: Create explicit norms for dissent, decisions, and help.

ORIGINAL COURSE MAXIM

Activity 02 | Create Accountabilities and Working Agreements

K3, K5, A7

A digital payments team has a Product Owner, Scrum Master, developers, architects, and line managers, but decisions are slow. Managers assign Sprint tasks, the Scrum Master writes status reports, and the Product Owner shares backlog control with a steering committee.

ROLE PLAY

Rehearse the decision with Scrum Master, Product Owner, Developer.

EVIDENCE

Produce accountability decision map and working agreement canvas.

QUALITY GATE

Covers Product Owner, Scrum Master, and Developers.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

REAL-WORKPLACE PRACTICE

Activity 03 | Coach a Team Through an Impediment

K3, K5, A7

A retail platform team loses two days each Sprint waiting for a security review. Developers want the Scrum Master to chase approvals; Security says requests arrive incomplete; the Product Owner keeps adding urgent compliance items mid-Sprint.

ROLE PLAY

Rehearse the decision with Scrum Master coach, Developer, Product Owner.

EVIDENCE

Produce impediment cause map and coaching record.

QUALITY GATE

Separates symptom and cause.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

Topic 2 | Evidence of competence

PROOF OF SHARED MEANING

A Scrum Master intervention is credible when it improves transparency, preserves accountability, enables adaptation, and produces evidence of effectiveness.

SECTION 03

Scrum Events and Facilitation

Sprint | Planning | Daily Scrum | Review | Retrospective | refinement | K4, A4, A5

Make value, flow, quality, and learning visible—then help the team adapt.

The Sprint Is the Container

Every Sprint turns an idea into a usable learning opportunity.

- **Fixed length of one month or less**
- Product Goal remains the compass
- Quality does not decrease
- Scope may be clarified with Product Owner

The Sprint Is the Container | What mastery looks like

1

Fixed length of one month or less

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Product Goal remains the compass

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Quality does not decrease

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Scope may be clarified with Product Owner

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

The Sprint Is the Container | Case lens

SIGNAL

Watch for scope churn erasing the Sprint Goal.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Negotiate scope while protecting the goal and quality.

SCRUM MASTER PITCH

Every Sprint turns an idea into a usable learning opportunity.

Use this as the Scrum Master coaching line, then prove it through: Negotiate scope while protecting the goal and quality.

ORIGINAL COURSE MAXIM

Sprint Planning Answers Three Questions

A strong Sprint Goal gives coherence to flexible scope.

Why is this Sprint valuable?

What can be Done?

How will the work get Done?

Capacity, quality, and dependencies inform the plan

Sprint Planning Answers Three Questions | What mastery looks like

1

Why is this Sprint valuable?

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

What can be Done?

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

How will the work get Done?

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Capacity, quality, and dependencies inform the plan

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Sprint Planning Answers Three Questions | Empirical loop

SCRUM MASTER PITCH

“A strong Sprint Goal gives coherence to flexible scope.”

Use this as the Scrum Master coaching line, then prove it through: Write one outcome-oriented Sprint Goal first.

ORIGINAL COURSE MAXIM

Daily Scrum Inspects Progress to the Sprint Goal

The Daily Scrum is a planning event, not a status report to the Scrum Master.

- **15-minute event for Developers**
- Choose any useful structure
- Expose impediments and adjust plan
- Detailed problem-solving happens after

Daily Scrum Inspects Progress to the Sprint Goal | What mastery looks like

1

15-minute event for Developers

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Choose any useful structure

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Expose impediments and adjust plan

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Detailed problem-solving happens after

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

CASE LENS

Daily Scrum Inspects Progress to the Sprint Goal | Case lens

SIGNAL

Watch for each person reporting upward.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Let Developers inspect the goal and re-plan together.

SCRUM MASTER PITCH

“The Daily Scrum is a planning event, not a status report to the Scrum Master.”

Use this as the Scrum Master coaching line, then prove it through: Let Developers inspect the goal and re-plan together.

ORIGINAL COURSE MAXIM

Sprint Review Is a Working Session

A Sprint Review changes what the team understands and may change what it does next.

- **Inspect the outcome**
- Discuss environmental change
- Engage stakeholders
- Adapt the Product Backlog

Sprint Review Is a Working Session | What mastery looks like

1

Inspect the outcome

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Discuss environmental change

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Engage stakeholders

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Adapt the Product Backlog

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Sprint Review Is a Working Session | Empirical loop

SCRUM MASTER PITCH

A Sprint Review changes what the team understands and may change what it does next.

Use this as the Scrum Master coaching line, then prove it through: Invite evidence, disagreement, and backlog adaptation.

ORIGINAL COURSE MAXIM

Retrospective Turns Experience into Improvement

Improvement becomes real only when it enters the work system.

- **Inspect people, interactions, process, tools, and DoD**
- Identify helpful and harmful assumptions
- Prioritize the most useful change
- Add improvement to the next Sprint

Retrospective Turns Experience into Improvement | What mastery looks like

1

Inspect people, interactions, process, tools, and DoD

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Identify helpful and harmful assumptions

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Prioritize the most useful change

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Add improvement to the next Sprint

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Retrospective Turns Experience into Improvement | Case lens

SIGNAL

Watch for a long list of unowned ideas.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Select one experiment with an owner and measure.

SCRUM MASTER PITCH

“Improvement becomes real only when it enters the work system.”

Use this as the Scrum Master coaching line, then prove it through: Select one experiment with an owner and measure.

ORIGINAL COURSE MAXIM

REAL-WORKPLACE PRACTICE

Activity 04 | Facilitate Sprint Planning and a Sprint Goal

K4, A2, A4

NovaTransit is improving a commuter app. The Product Backlog contains accessibility fixes, payment reliability work, journey-planning features, and marketing requests. Capacity is reduced by support duty and one unresolved vendor dependency.

ROLE PLAY

Rehearse the decision with Scrum Master facilitator, Product Owner, Developers.

EVIDENCE

Produce sprint goal and sprint backlog forecast.

QUALITY GATE

Answers why, what, and how.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

REAL-WORKPLACE PRACTICE

Activity 05 | Redesign the Daily Scrum Around Flow

K4, A4, A7

The Daily Scrum at BrightBank lasts 35 minutes. Each Developer reports to the Scrum Master while others multitask. Blockers repeat, work piles up in testing, and the Sprint Goal is not mentioned.

ROLE PLAY

Rehearse the decision with Scrum Master, Developers, Product Owner observer.

EVIDENCE

Produce daily scrum facilitation canvas and flow diagnosis.

QUALITY GATE

Finishes within 15 minutes.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

REAL-WORKPLACE PRACTICE

Activity 06 | Turn a Sprint Review into Stakeholder Collaboration

K2, K4, A1, A5

An e-commerce team demos completed screens at Sprint Review, collects compliments, and ends. Customer-service data shows a rise in checkout confusion, but stakeholders see the backlog only after priorities are finalized.

ROLE PLAY

Rehearse the decision with Scrum Master facilitator, Product Owner, Developers.

EVIDENCE

Produce sprint review agenda and stakeholder feedback map.

QUALITY GATE

Uses a real Increment and evidence.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

Topic 3 | Evidence of competence

PROOF OF SHARED MEANING

A Scrum Master intervention is credible when it improves transparency, preserves accountability, enables adaptation, and produces evidence of effectiveness.

Afternoon Break

10 minutes

Pause the noise. Return with attention.

SECTION 04

Scrum Project Management and Evidence

goals | forecasting | flow | burn charts | experimentation | change | K4, K6, A2, A4, A5, A6

Make value, flow, quality, and learning visible—then help the team adapt.

Manage Outcomes Across Three Horizons

Goals stabilize purpose while plans remain adaptable.

Product Goal gives long-term direction

Sprint Goal focuses the current Sprint

Definition of Done protects quality

Daily plan adapts within the Sprint

Manage Outcomes Across Three Horizons | What mastery looks like

1

Product Goal gives long-term direction

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Sprint Goal focuses the current Sprint

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Definition of Done protects quality

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Daily plan adapts within the Sprint

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Manage Outcomes Across Three Horizons | Case lens

SIGNAL

Watch for teams tracking tasks without outcome.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Connect every forecast to a goal and evidence.

SCRUM MASTER PITCH

“Goals stabilize purpose while plans remain adaptable.”

Use this as the Scrum Master coaching line, then prove it through: Connect every forecast to a goal and evidence.

ORIGINAL COURSE MAXIM

Forecast with Evidence, Not Certainty

A forecast is a probability informed by history, not a promise extracted from the team.

- **Throughput shows completed items**
- Cycle time shows elapsed flow
- Velocity is local planning evidence
- Capacity reflects current constraints

Forecast with Evidence, Not Certainty | What mastery looks like

1

Throughput shows completed items

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Cycle time shows elapsed flow

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Velocity is local planning evidence

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Capacity reflects current constraints

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Forecast with Evidence, Not Certainty | Empirical loop

SCRUM MASTER PITCH

A forecast is a probability informed by history, not a promise extracted from the team.

Use this as the Scrum Master coaching line, then prove it through: Use trends for conversation, never performance ranking.

ORIGINAL COURSE MAXIM

Read Burndown and Burnup Together

Charts reveal patterns; the team must still interpret causes and decide.

- **Burndown shows remaining work**
- Burnup separates progress from scope change
- Both require transparent definitions
- Neither measures customer value

Read Burndown and Burnup Together | What mastery looks like

1

Burndown shows remaining work

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Burnup separates progress from scope change

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Both require transparent definitions

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Neither measures customer value

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Read Burndown and Burnup Together | Case lens

SIGNAL

Watch for a flat line blamed on individuals.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Ask what changed in scope, flow, quality, or dependencies.

SCRUM MASTER PITCH

“Charts reveal patterns; the team must still interpret causes and decide.”

Use this as the Scrum Master coaching line, then prove it through: Ask what changed in scope, flow, quality, or dependencies.

ORIGINAL COURSE MAXIM

Design Safe-to-Learn Experiments

An experiment is disciplined learning under uncertainty.

- **State a testable hypothesis**
- Limit cost and time
- Define evidence before starting
- Decide pivot, persevere, or stop

Design Safe-to-Learn Experiments | What mastery looks like

1

State a testable hypothesis

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Limit cost and time

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Define evidence before starting

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Decide pivot, persevere, or stop

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Design Safe-to-Learn Experiments | Empirical loop

SCRUM MASTER PITCH

“An experiment is disciplined learning under uncertainty.”

Use this as the Scrum Master coaching line, then prove it through: Pre-commit to the decision rule.

ORIGINAL COURSE MAXIM

Change Management Through Scrum

Scrum events provide repeated opportunities to involve people and adapt change.

- **Create awareness through transparency**
- Build desire through participation
- Develop knowledge and ability through practice
- Reinforce with cadence and evidence

Change Management Through Scrum | What mastery looks like

1

Create awareness through transparency

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Build desire through participation

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Develop knowledge and ability through practice

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Reinforce with cadence and evidence

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Change Management Through Scrum | Case lens

SIGNAL

Watch for change communicated only at launch.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Use every Sprint as a feedback and reinforcement cycle.

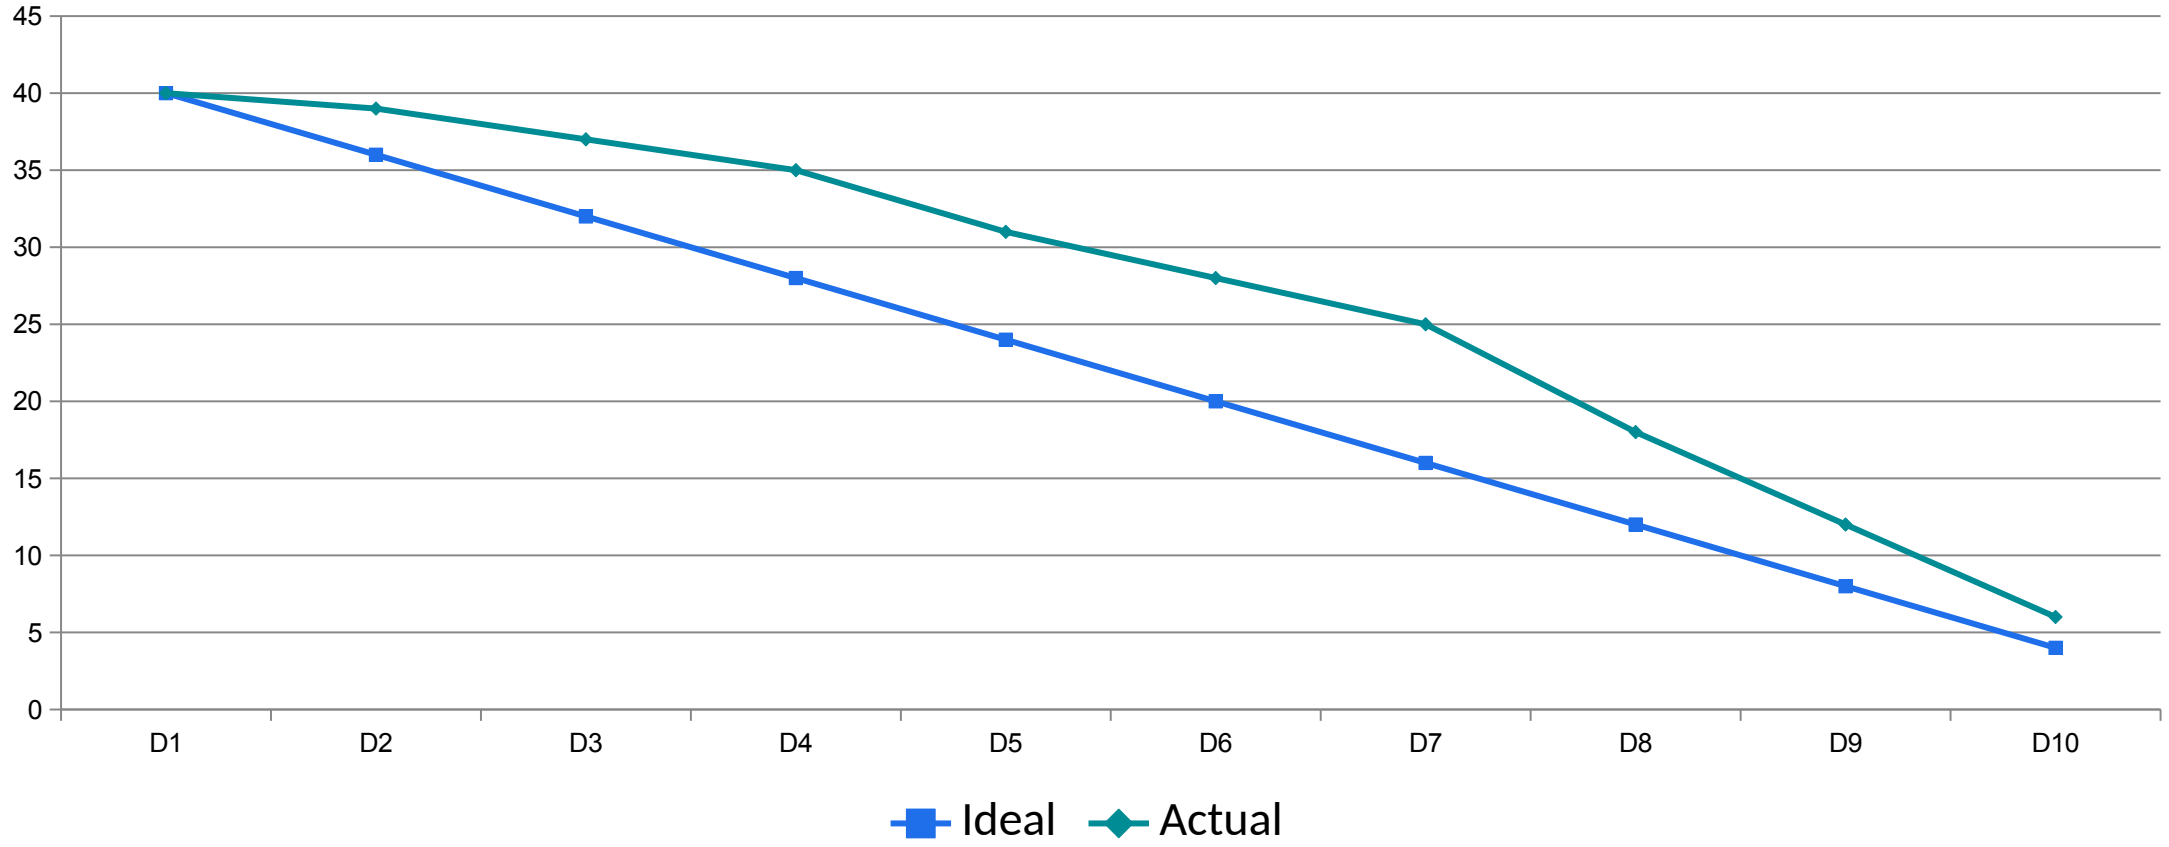

SCRUM MASTER PITCH

Scrum events provide repeated opportunities to involve people and adapt change.

Use this as the Scrum Master coaching line, then prove it through: Use every Sprint as a feedback and reinforcement cycle.

ORIGINAL COURSE MAXIM

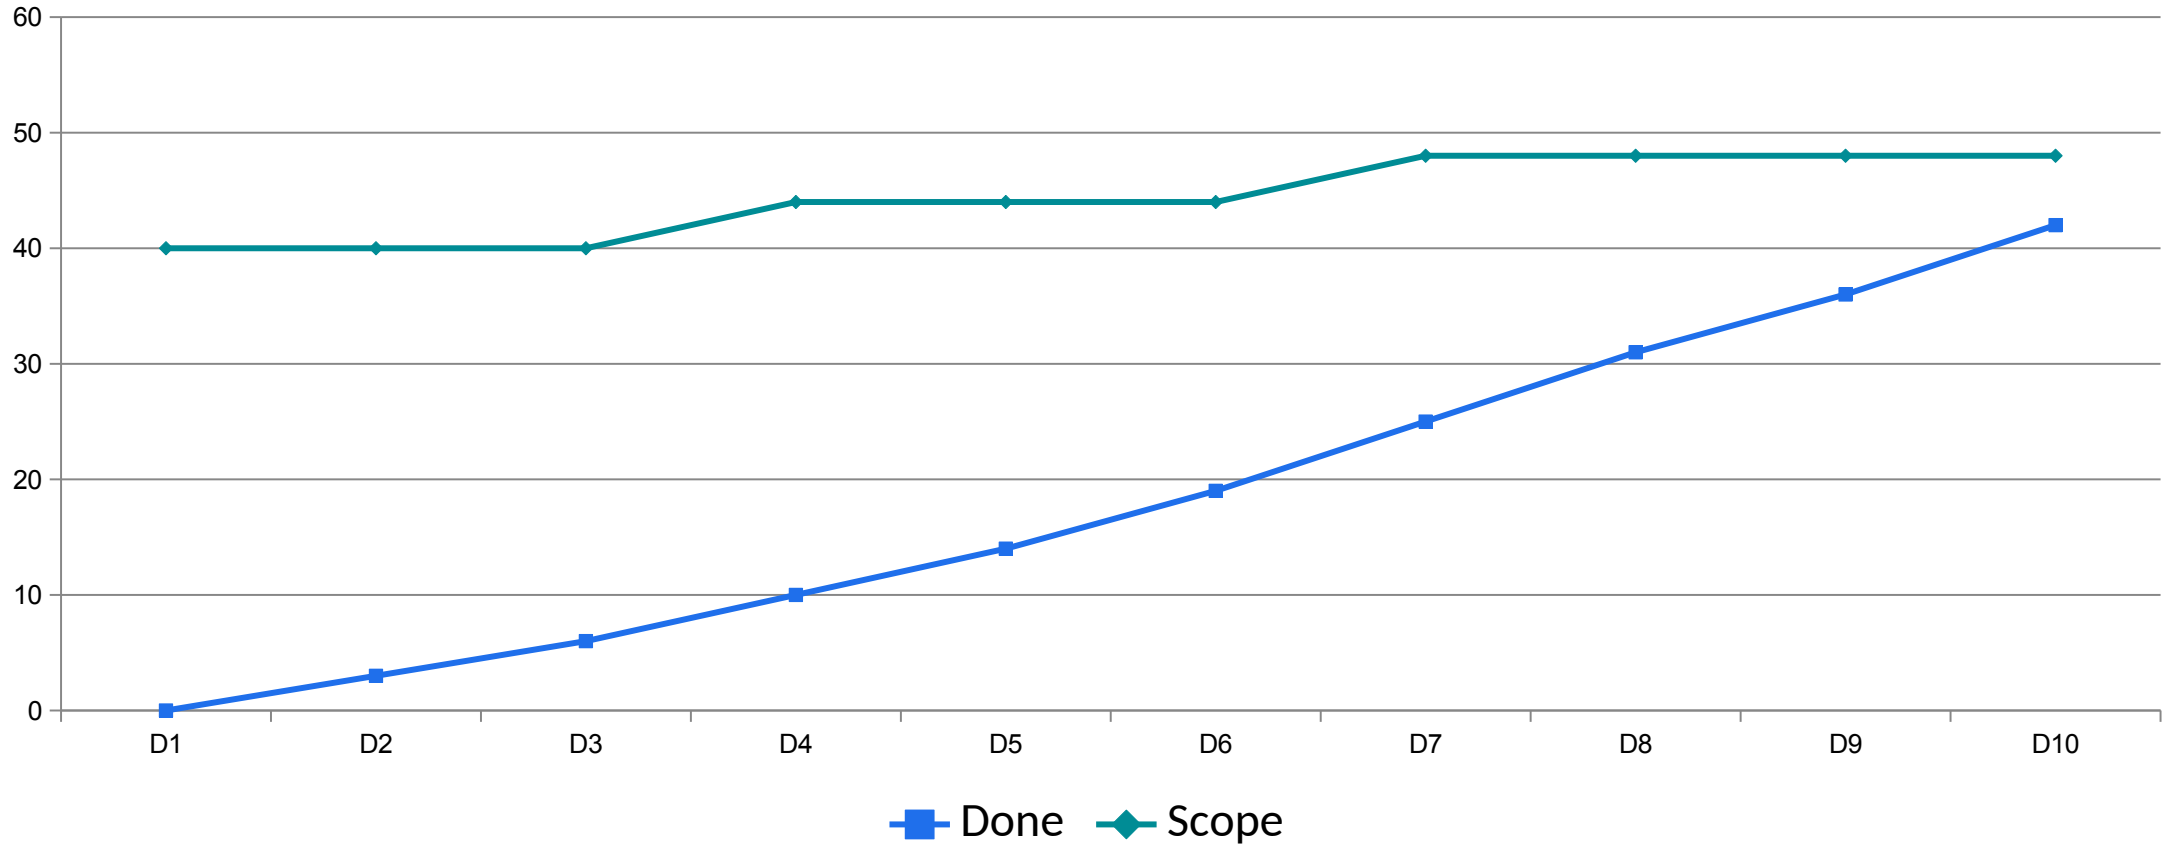

Sprint Burndown | Remaining work

WHAT THE DATA SHOWS | Actual work falls slowly until a late drop; inspect item size, flow, dependencies, and quality (Indicative teaching data.)

EVIDENCE | EDITABLE POWERPOINT CHART

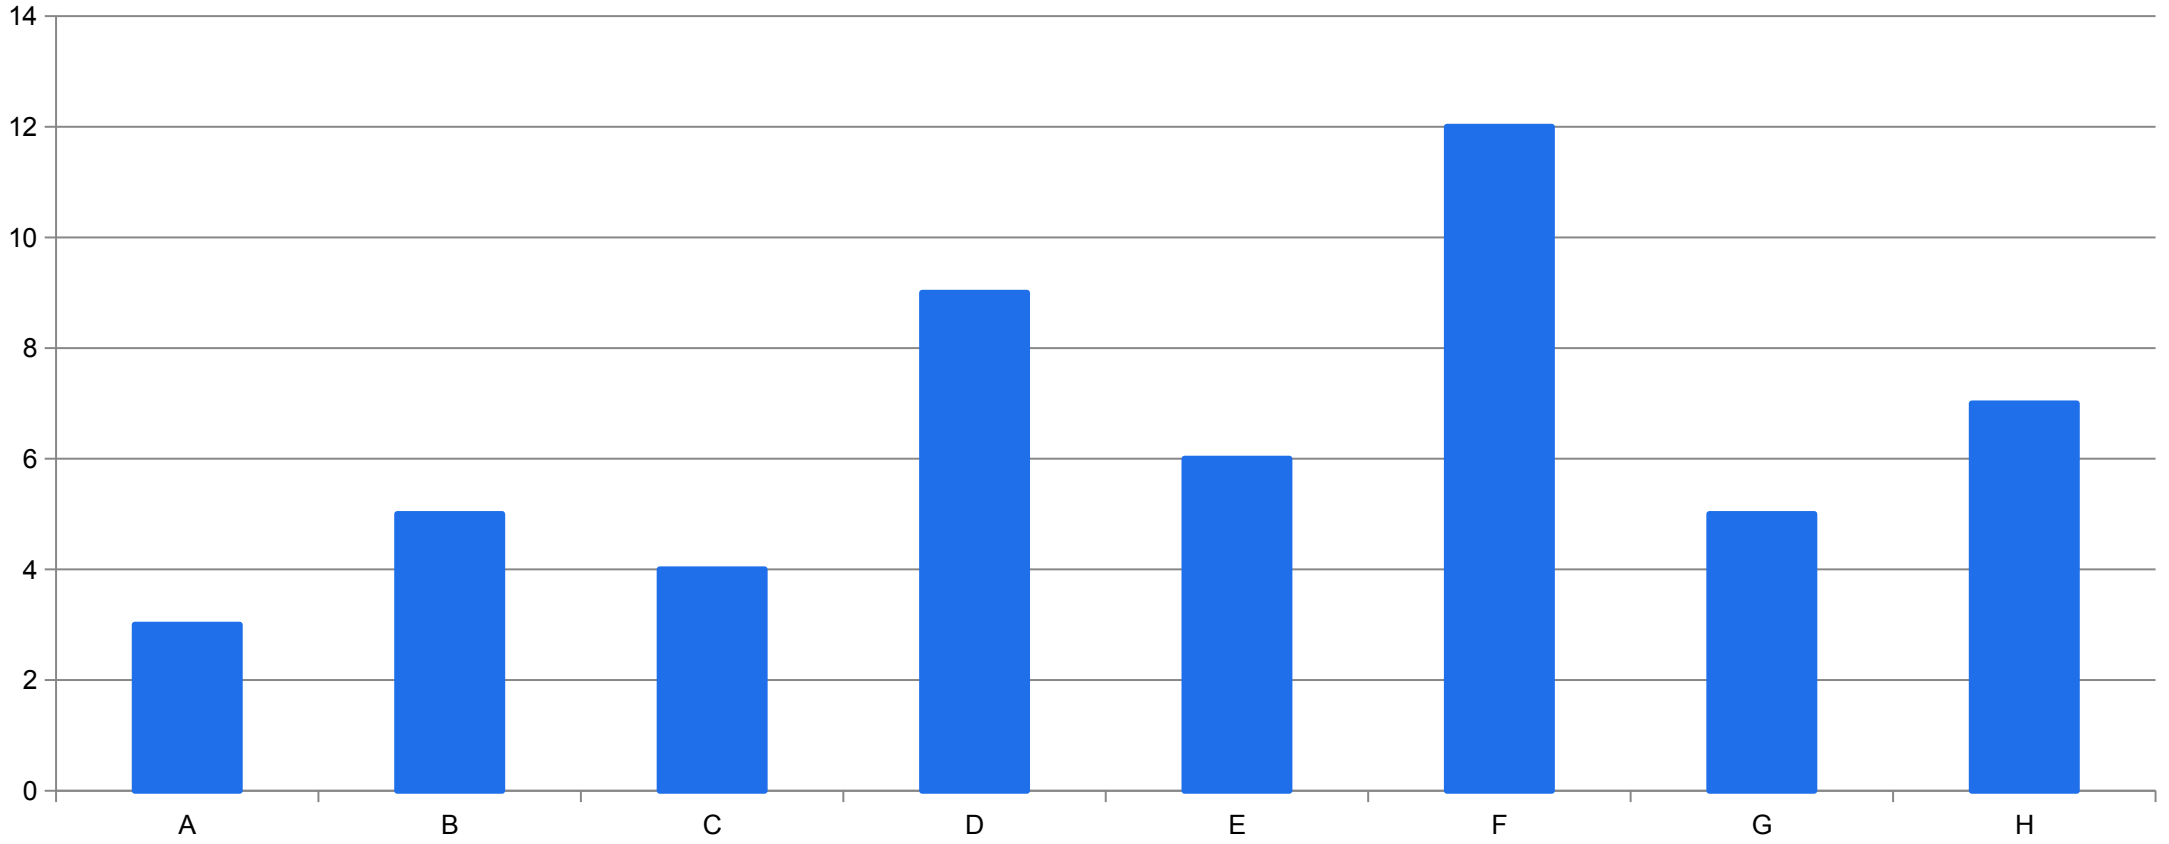

Sprint Burnup | Done versus scope

WHAT THE DATA SHOWS | The scope line exposes change that a burndown can hide; interpret progress and scope separately (Indicative teaching data.)

EVIDENCE | EDITABLE POWERPOINT CHART

Cycle Time by work item

WHAT THE DATA SHOWS | Items F and D are signals for inspection; ask what delayed flow before setting a target (Indicative teaching data.)

REAL-WORKPLACE PRACTICE

Activity 07 | Interpret Burn Charts and Flow Metrics

K4, K6, A4, A6

A public-services team reports stable velocity, but work regularly carries over and stakeholders are surprised by scope changes. Leaders want a dashboard to compare teams, while Developers want evidence that helps them improve.

ROLE PLAY

Rehearse the decision with Scrum Master, Developers, Product Owner.

EVIDENCE

Produce metric interpretation sheet and evidence-to-decision map.

QUALITY GATE

Reads burndown and burnup correctly.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

REAL-WORKPLACE PRACTICE

Activity 08 | Run an Evidence-Based Retrospective

K4, A5, A6, A7

A media team has repeated the same Retrospective actions for three Sprints. Participation is uneven, actions have no owners, and the team blames an external dependency without testing alternatives.

ROLE PLAY

Rehearse the decision with Scrum Master facilitator, Developers, Product Owner.

EVIDENCE

Produce retrospective evidence board and improvement hypothesis.

QUALITY GATE

Creates psychological safety.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

Topic 4 | Evidence of competence

PROOF OF SHARED MEANING

A Scrum Master intervention is credible when it improves transparency, preserves accountability, enables adaptation, and produces evidence of effectiveness.

SECTION 05

Scrum Artifacts and Information Radiators

Product Backlog | Sprint Backlog | Increment | commitments | collaboration | K7, A1, A2, A3, A6

Make value, flow, quality, and learning visible—then help the team adapt.

Product Backlog + Product Goal

Ordering expresses the next best use of the Scrum Team's capacity.

- **Emergent ordered list**
- Single source of product work
- Items gain detail through refinement
- Product Goal describes a future state

Product Backlog + Product Goal | What mastery looks like

1

Emergent ordered list

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Single source of product work

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Items gain detail through refinement

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Product Goal describes a future state

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Product Backlog + Product Goal | Case lens

SIGNAL

Watch for priority labels with no trade-off.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Order items explicitly using value, risk, learning, and dependency.

SCRUM MASTER PITCH

“Ordering expresses the next best use of the Scrum Team's capacity.”

Use this as the Scrum Master coaching line, then prove it through: Order items explicitly using value, risk, learning, and dependency.

ORIGINAL COURSE MAXIM

Refinement Makes Work Ready for Conversation

Refinement improves shared understanding; it does not freeze requirements.

- **Break down and clarify items**
- Add description, order, and size
- Developers estimate
- Do not create a hidden approval gate

Refinement Makes Work Ready for Conversation | What mastery looks like

1

Break down and clarify items

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Add description, order, and size

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Developers estimate

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Do not create a hidden approval gate

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Refinement Makes Work Ready for Conversation | Empirical loop

SCRUM MASTER PITCH

Refinement improves shared understanding; it does not freeze requirements.

Use this as the Scrum Master coaching line, then prove it through: Refine enough for a responsible forecast.

ORIGINAL COURSE MAXIM

Sprint Backlog + Sprint Goal

The Sprint Backlog is a plan by and for Developers.

- **Sprint Goal explains why**
- Selected items show what
- Actionable plan shows how
- Developers update it throughout the Sprint

Sprint Backlog + Sprint Goal | What mastery looks like

1

Sprint Goal explains why

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Selected items show what

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Actionable plan shows how

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Developers update it throughout the Sprint

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Sprint Backlog + Sprint Goal | Case lens

SIGNAL

Watch for a board maintained by the Scrum Master.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Make the plan visible where Developers adapt it.

SCRUM MASTER PITCH

“The Sprint Backlog is a plan by and for Developers.”

Use this as the Scrum Master coaching line, then prove it through: Make the plan visible where Developers adapt it.

ORIGINAL COURSE MAXIM

Increment + Definition of Done

Done means usable and transparent—not almost finished.

- **Usable step toward Product Goal**
- Additive to prior Increments
- Verified against one quality standard
- May be released before Sprint Review

Increment + Definition of Done | What mastery looks like

1

Usable step toward Product Goal

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Additive to prior Increments

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Verified against one quality standard

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

May be released before Sprint Review

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Increment + Definition of Done | Empirical loop

SCRUM MASTER PITCH

“Done means usable and transparent—not almost finished.”

Use this as the Scrum Master coaching line, then prove it through: Create one shared Definition of Done for the product.

ORIGINAL COURSE MAXIM

Information Radiators Enable Collaboration

A visible artifact is useful only when people can act on what it reveals.

- **Show goals and current flow**
- Expose quality and impediments
- Keep data near decision-makers
- Protect transparency from vanity metrics

Information Radiators Enable Collaboration | What mastery looks like

1

Show goals and current flow

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

2

Expose quality and impediments

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

3

Keep data near decision-makers

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

4

Protect transparency from vanity metrics

Name the signal. Connect it to a goal. Choose an adaptation and evidence.

Information Radiators Enable Collaboration | Case lens

SIGNAL

Watch for dashboards viewed but not discussed.

RISK

If hidden, the pattern distorts value, flow, quality, ownership, or learning.

BETTER MOVE

Pair every signal with an owner and decision cadence.

SCRUM MASTER PITCH

A visible artifact is useful only when people can act on what it reveals.

Use this as the Scrum Master coaching line, then prove it through: Pair every signal with an owner and decision cadence.

ORIGINAL COURSE MAXIM

REAL-WORKPLACE PRACTICE

Activity 09 | Order a Product Backlog with Customer Evidence

K1, K2, K7, A1, A2, A3

A food-delivery platform has forty candidate items from customers, operations, fraud, accessibility, and growth teams. Every stakeholder labels their request high priority, and hidden dependencies cause rework during Sprints.

ROLE PLAY

Rehearse the decision with Product Owner, Scrum Master, Developers.

EVIDENCE

Produce ordered product backlog and evidence and dependency matrix.

QUALITY GATE

Connects order to Product Goal.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

REAL-WORKPLACE PRACTICE

Activity 10 | Capstone Scrum Master Facilitation Plan

K1-K7, A1-A7

Meridian Mobility is launching an accessible transport subscription in eight weeks. Its Scrum Team has unclear accountabilities, a long Daily Scrum, inconsistent Definition of Done, late stakeholder feedback, rising cycle time, and a Product Backlog driven by the loudest requester.

ROLE PLAY

Rehearse the decision with Scrum Master, Product Owner, Developers.

EVIDENCE

Produce scrum system diagnosis and 30-day facilitation plan.

QUALITY GATE

Covers K1-K7 and A1-A7.

Full click-by-click instructions, tool steps, worksheets, mock data, and acceptance criteria are in the Learner Guide and individual activity folders.

Topic 5 | Evidence of competence

PROOF OF SHARED MEANING

A Scrum Master intervention is credible when it improves transparency, preserves accountability, enables adaptation, and produces evidence of effectiveness.

SECTION 99

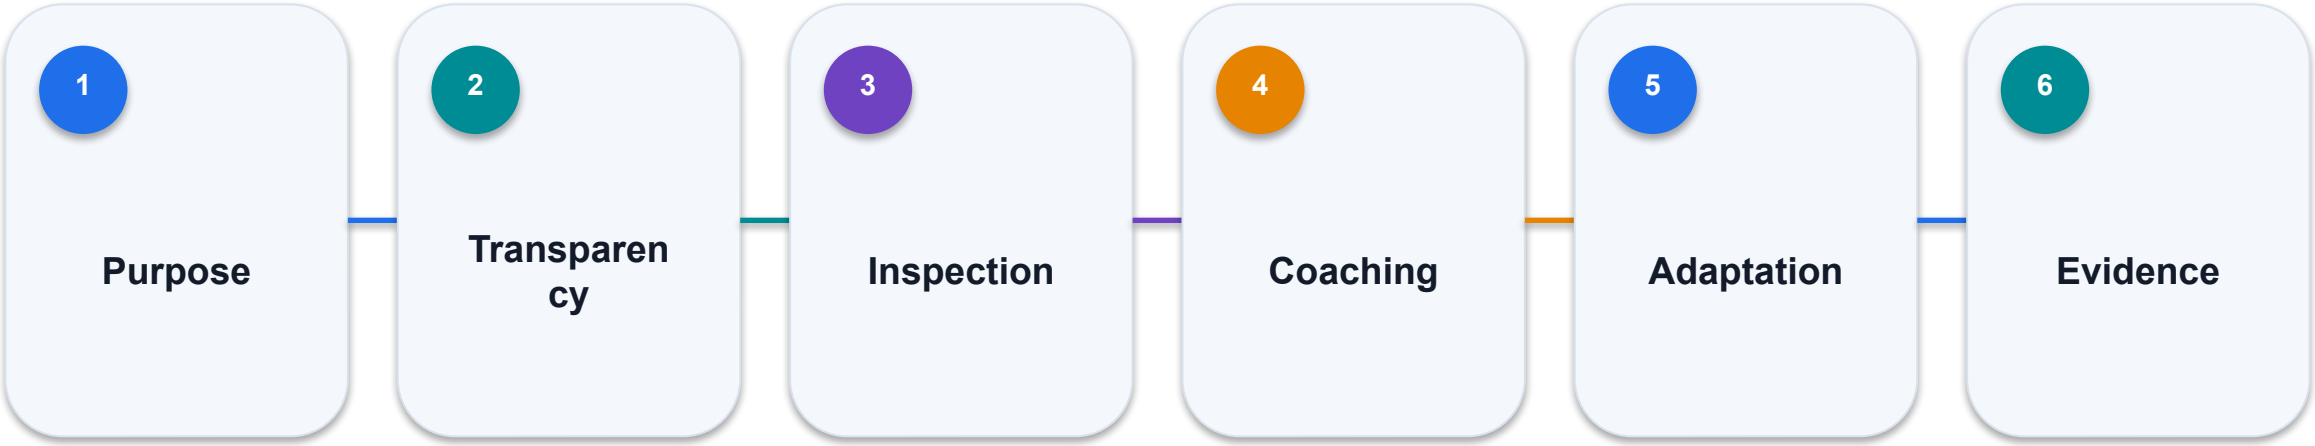

Integration

From isolated practices to an effective Scrum system

Make value, flow, quality, and learning visible—then help the team adapt.

The Scrum Master Effectiveness Loop

What You Achieved

1

IMPLEMENT

Use Agile Scrum practices to analyse requirements.

2

ENABLE

Clarify accountabilities and coach self-management.

3

FACILITATE

Make Scrum events purposeful and evidence-led.

4

IMPROVE

Use artifacts and measures to collaborate and adapt.

FINAL PITCH

“The Scrum Master does not make the team effective for them.”

Create the conditions in which the team can see, decide, learn, and improve.

ORIGINAL COURSE MAXIM

Courseware and Assessment on the LMS

1. **Download learner slides, Learner Guide, and activity packs**
2. Use the browser-based Scrum tool during activities
3. Complete the WA and Case Study using approved materials
4. https://lms-tms.tertiaryinfotech.com/

Assessment

WA | 1 HOUR

Seven open-ended knowledge questions K1-K7.

CASE STUDY | 1 HOUR

Five integrated questions covering A1-A7.

SUBMIT

Assessment attendance, LMS upload, and summary-record signature.

Assessment Flow

Digital Attendance | Mandatory

1

AM

Morning attendance recorded.

2

PM

Afternoon attendance recorded.

3

ASSESSMENT

Assessment attendance recorded separately.

4

COMPLETE

Confirm submission with the trainer before leaving.

Thank You

Make work visible. Invite truth. Help the team adapt.
